

## MICROTOURISM

*I started off on a lengthy  
journey  
and found myself in the  
cell's stat  
I was afraid lest I feel  
desperate  
but instead I was startled  
with joy*

*What an incredible world is  
working  
day and night with so many  
machines  
in such harmony  
that cannot even be found  
in the most lavishly  
decorated churches*

*To pass through the gate  
I had to go through a  
terrible control  
guards, lipids, proteins,  
receptors  
all of them check*

*whether you will pass the  
entrance  
As soon as you enter  
the State of the select  
you will face thousands of  
machines  
each one working  
separately  
but in a magic way*

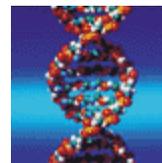

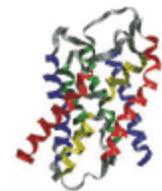

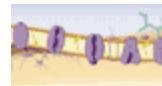

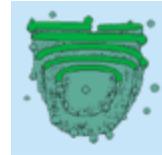

*all of them contribute to  
the effort  
which coordinates this  
world*

*Even the most trivial  
electrons  
know when to pass  
through the membranes  
they get energy from  
sugar  
within the mitochondria  
and thus, all the parts  
can move*

*Even if the code is  
hidden  
in the dark abyss of the  
nucleus  
again wisely the secrets  
pass  
to the cytoplasm by a  
mysterious trail*

*They carry a code  
secretly copied in letters  
reaching  
the endoplasmic  
reticulum network  
and follow the pathway  
to the home  
dressed in red colours  
and magically we call it  
ribosomes*

*Quickly the code's  
tangled words  
are assembled in  
order  
with secrets they  
untangle  
they synthesise the  
proteins for life*

*Workers come and go  
the hormones  
in the nucleus, the  
cytoplasm,  
the golgi, and  
everywhere  
as though they are  
asking  
from all the other parts  
to obey only them*

*But here there is  
harmony  
and very deep mystery  
nature decorated with  
a magic crown  
knits happily a web  
which knows billions of  
aims every minute  
and to compose the  
cell's  
most melodic tune*
