Discussion and audience participation.

*“The escalating global financial crisis should not be used as an excuse to halt climate change efforts. The root of both problems is a crisis in values, in which short-term benefits are placed before the long-term survival of life on our planet. The present event, jointly organised by the Biopolitics International Organisation and the Hellenic Chapter of the Club of Rome, aims to promote an exchange of views for a brighter and more hopeful future. An international strategy with a vision is an urgent priority, in order to balance broad development goals and the increasing necessity to meet climate change needs.” Prof. Agni Vlavianos Arvanitis*
