

BIOPOLITICS INTERNATIONAL ORGANISATION

RomABC – the next dimension – Erasmus+

Pilot Training in Kiskunhalas, Hungary

August 26 to September 5, 2018

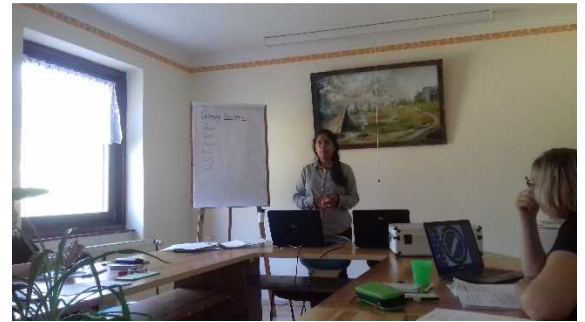

The Biopolitics International Organisation (B.I.O.) proudly participated in a Pilot Training event which took place in Kiskunhalas, Hungary, from August 26 to September 5, 2018, within the framework of the RomABC – the next dimension! / Erasmus+ project. B.I.O. trainers participated along with trainers from the partner organizations, from Germany, Romania and Hungary.

The participants had the opportunity to take active part in several training group activities and sessions. Themes included the specialized fields of the alphabetization process and the role of the trainer, the history, culture and real needs of the Roma, as well as motivational techniques and approaches used in adult Roma education.

Furthermore, the B.I.O. trainers took part in workgroups addressing the educational material of the Handbook for Trainers (prepared specifically for the project), and using examples and practical exercises in the following fields:

- a) reading and writing
- b) classic alphabetization
- c) basic IT skills and numeracy
- d) capabilities in everyday life
- e) learning in another place, and
- f) learning to learn.

At the end of the event, the participants developed new training material and expanded their educational techniques and experience in Roma adult education.

We are looking forward to the next steps of the project and to meeting our partners again in Plauen, in December.
