Climate Change & Blue Growth
Free e-learning course

Register now and up to July 6 in elearning.biopolitics.gr for a free e-learning course on “Climate Change & Blue Growth.” The course offers an extensive overview of how climate change affects our seas and oceans, rules and regulations governing ocean use, ways in which a Blue Economy can be achieved, and what responses and solutions are available to inspire and mobilize people everywhere to become stewards of our planet.

A Certificate of Participation will be issued.

Registration: June 18 – July 6, 2020

Duration: July 6 – August 30, 2020 (8 weeks / 70 hours)

This course is for:

Tourism and environmental professionals, journalists and media workers, private and public sector actors, members of civil society organizations, practitioners concerned with the preservation and conservation of the oceans, students and graduate students.

Prerequisites: None

Structure:

4 study modules featuring reading material and study questions
1 final multiple choice quiz
